

ZURICH RETREAT  
inspiring life

# ZurichRetreat Association

*Become a Part of the Project - Join as a Member or Donor*

## THE PROJECT

In a world of changing paradigms, it becomes necessary for individuals and organisations to become acquainted with new ways of living and working. ZurichRetreat is creating a transformative campus where integral learning experiences will be available to a broad public. Thanks to its unique infrastructure, ZurichRetreat is a space for inspiration, connection and change. Our offering will be available in three centres, focusing on organisational development, holistic wellbeing, as well as innovation and knowledge transfer. Our goal is to become a leading competence centre in Europe for next-generation organisations, applied sustainable living and vertical learning.

## NEXT STEPS AND GOALS

Since its launch one year ago, the project has grown thanks to the dedicated work of our volunteers. To ignite the next phase and source the required seed-funding, we are updating the corporate identity and our marketing materials. These expenses will be covered with your contributions and directly influence the project's success. We hope to close the funding by summer and are already in touch with potential partners, as well as evaluating various sites.

## PURPOSE

The Association is the vessel for the ZurichRetreat project, providing the legal framework to coordinate and organise all activities of ZurichRetreat.

The main goal is to actively participate in furthering the evolution of consciousness, thereby nurturing a holistic and sustainable society.

The ZurichRetreat project will create a living education centre dedicated to incubating and imparting knowledge that supports the main goal. The centre will be a place of connection and co-creation for all walks of life and serves as an inspiration for change.
