Inspiring Life

A COMPETENCE CENTRE FOR
MODERN ORGANISATIONS,
VERTICAL LEARNING &
APPLIED SUSTAINABILITY

www.zurichretreat.com

The Project

We aim to facilitate the shift towards a new way of thinking driven by consciousness and supported by new ways of learning. Our goal is to become a leading competence centre for next-generation organisations, applied sustainable living and vertical learning.

We are building a holistic campus for organisational development, conscious leadership, social innovation, wellbeing and sustainable living - and we would love for you to be part of it!

Zurich Retreat is a visionary project for a conscious society. We are bringing together best practices and creating sustainable innovation - all within a beautiful natural setting. We believe that everyone is born with the ability to connect with their inner resources to transform their lives for the better. Together, we hold the capacity to transform ourselves, organisations and society at large.

Our Vision is Built on Three Pillars

Purpose-built environment

Our modern eco-infrastructure and its natural surroundings are a sanctuary for the body, mind and soul. We are building an immersive space for healing, inspiration and experiential learning through all the senses, filled with positive collective energy to facilitate deep connections and transformation.

Conscious co-creation

We are committed to cross-generational, multi-disciplinary collaboration and welcome diverse points of view and creative insights. We provide the soil and space for incubating and bringing innovative ideas to life, as well as new business models and organisational systems that lead to systemic change.

Wellbeing

The separations between our minds and hearts, as well as purpose and organisational systems, need to be healed in order to build wellbeing in our societies. We invite individuals and teams to re-discover and re-learn how to connect to each other and the environment from a place of self-awareness and empathy.

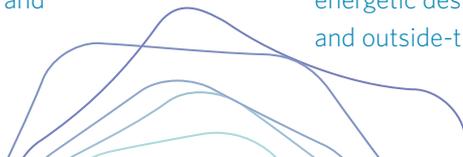

Holistic Space

Zurich Retreat provides a platform for inspiring workshops, gatherings and retreats. We do this by integrating the latest research and hosting global pioneers of innovative ideas, holistic wellbeing and mindful leadership.

We welcome individuals, businesses and organisations to visit us, attend our courses, or hire the space for experiential learning events, incentives, courses and deep-dive getaways.

We offer a signature curriculum based on a transformational learning journey that creates wholeness and purpose in organisations, and leads to self organisation.

Our unique multipurpose infrastructure and specially designed integral learning experiences create an ideal setting for transformation and inspiration. Comfort and energetic design are combined with healthy gastronomy and outside-the-box leisure activities.

Fostering Change

WHY

Consciousness

Create awareness about the challenges facing society, their systemic causes and possible solutions

Team

We are a team of like-minded people with a deep longing for a different world. All of us have left behind corporate careers in order to fill our lives with more meaning and purpose, and are now working on a common vision for positive change in society.

Become part of trailblazing leaders & organisations

Zurich Retreat is a transformational model for applied personal growth and organisational development. Last year, we laid the foundations of the project and now we are getting ready to launch the implementation phase.

The Zurich Retreat Association is our current legal vessel that allows you to become part of the movement and support us via membership or donation.

More details upon request:
partners@zurichretreat.com

Partner with us and be part of Zurich Retreat's development

Whether you are an individual, a business leader, a foundation or corporation, we invite you to connect with us and find out how we can co-create a better future together. There is a variety of collaboration possibilities; from partnering with us for funding, to creating strategic partnerships or developing joint curriculums.

We act as an operating company with a real estate division as the main investment vehicle, providing the opportunity to invest in prime real estate and infrastructure.
